

I listen to Satellite Radio most of the time when I am in my vehicle, and being able to get Instant Traffic & Weather helps me to know what is up ahead. I pay for the right to be able to do this and I don't think the National Association of Broadcasters should be allowed to tell me or any one else what I can listen to on my radio. I get a strong clear signal in my area, when the AM or FM stations don't always give a clear signal. I enjoy listening to XM Satellite Radio.

I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve as a listener.
